

CIPEG Resolution 2016

Following on from last year's resolution: "We support our colleagues in Egypt in their struggle to protect the heritage of their country", we continue to support our Egyptian colleagues during the transfer of selected collections to new museum landscapes including the Grand Egyptian Museum (GEM).

We recognize that the Tutankhamun treasures, counted among the most important and unique archaeological finds of all time, will be the central attraction to the GEM. We acknowledge the particular challenges involving the transfer of the fragile collections from the tomb of Tutankhamun on the proposed accelerated timeline. CIPEG supports and encourages international collaboration of conservators and Egyptologists with our Egyptian colleagues during this transfer of objects.

CIPEG is prepared to assist our Egyptian colleagues in this challenging project."
